	D	22 / 8	22 / 8	22 / 8	15	20
	E	NS	26 / 12	24 / 10	15	20

- Anchor rods of the diameter indicated in the table shall be ASTM F1554 Grade 36 or ASTM A36 minimum threaded rods.
- Post-installed solutions must be installed with Simpson Strong-Tie® SET-XP™, SET or AT Acrylic-Tie® anchoring adhesives.
- Simpson Strong-Tie SET-XP™ anchoring adhesive may be required in some building jurisdictions.
- SW mudsill anchors shall be ½" diameter x 12" long minimum embedded 7". For post-installed adhesive installation, use ⅝" diameter x 10" long all-thread rod minimum (model RFB#5x10) embedded 5".
- NS = No solution available.
- See general note 11 for additional anchorage and foundation information.
